# Setting

Back-end access: Choose “Component” from the main menu. Click “BT Portfolio” to start configuration process.

All configuration parameters are divided into the following areas:

- Extra fields Manager
- Categories Manager
- Portfolios Manager
- Comments
- Configuration

## Extra Fields Manager

Each portfolio can have different informations like: Portfolio’s client, Service type ... That’s why this component was built with an Extra Fields Manager. Extra fields will be assign to each category. Managing them in BT Portfolio is as simple as in orther original components of Joomla. It contain a list, toolbar, filter and ordering.

**Extra fields manager**

<b>Author</b>	Value of "author" meta tag
<b>Content Rights</b>	Value of "copyright" meta tag

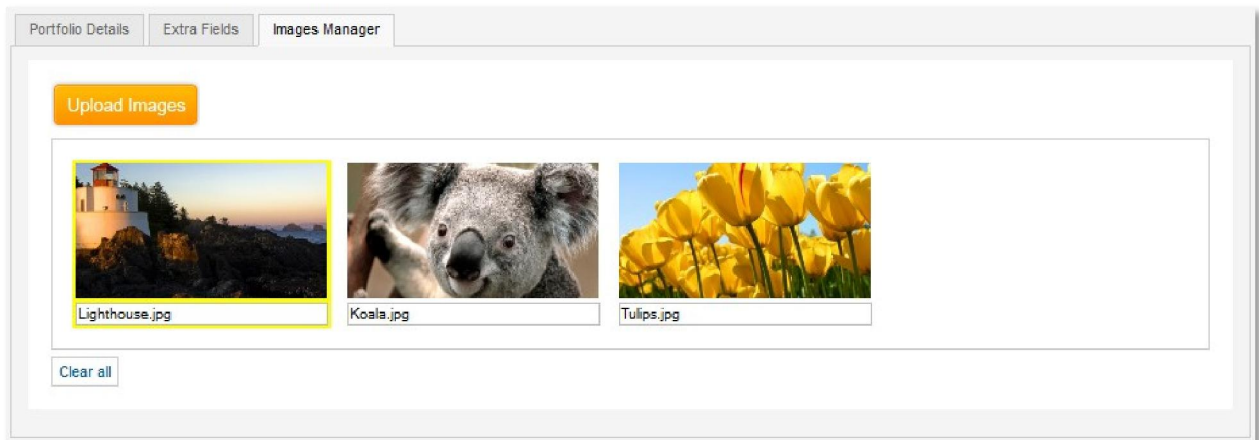

○ Extra Fields

This is “Extra Fields” tab in Portfolio edit page, all extra fields of categories which the portfolio belong with are listed here. You can enter or choose a particular value to these extra fields.

○ Images Manager

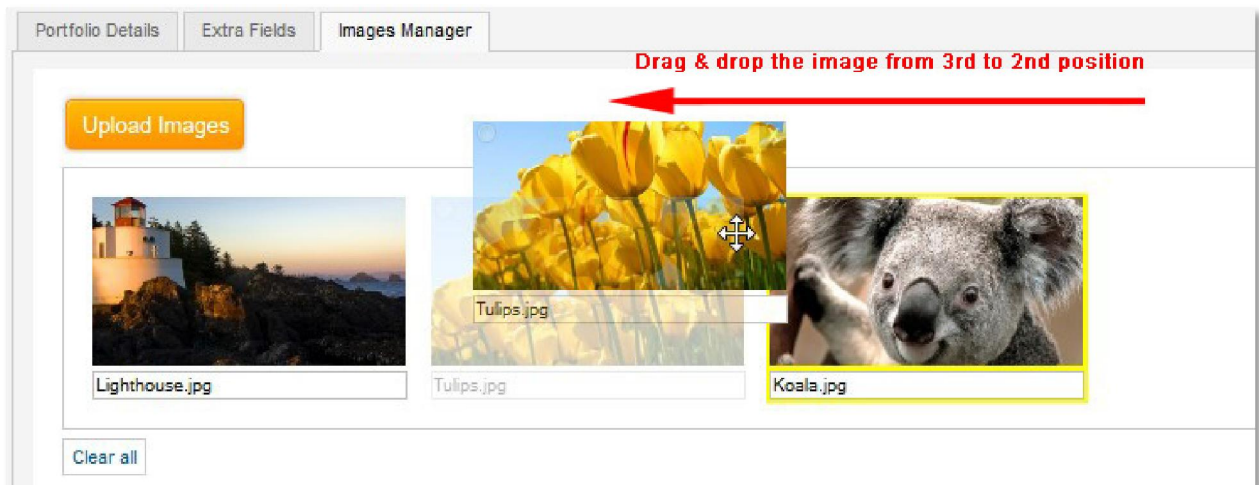

Manage portfolio’s gallery here.

- Deleting image: You can completely remove one or multiple images by clicking “Clear all” or click the delete icon **X** on each images when you mouse over them.
- Making an image default: you can choose an image to make it portfolio’s default image by clicking radio button on top-left corner of image.

- Ordering images: just drag and drop it to new position

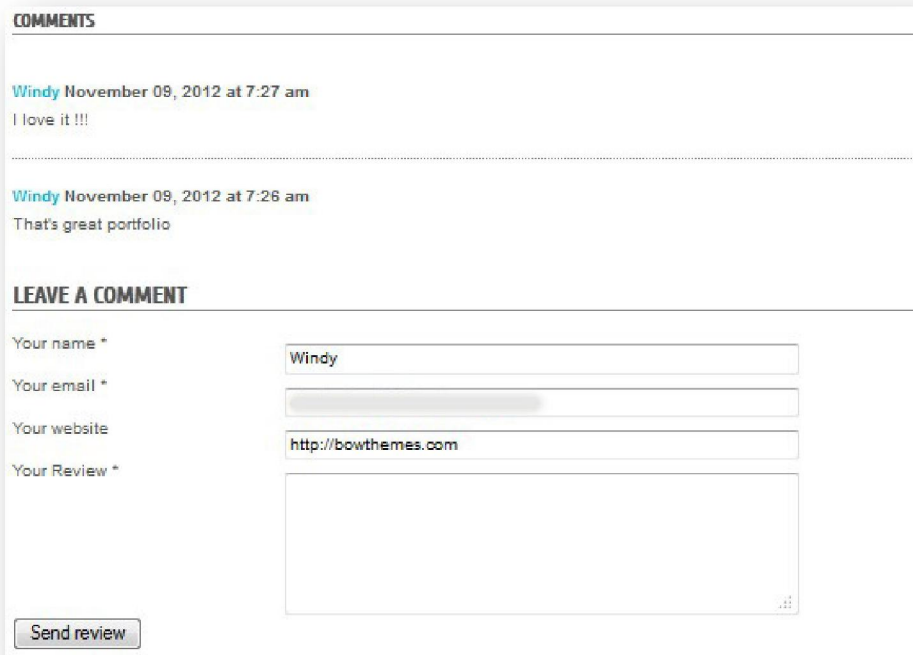

## Comments

This feature allows you see all comments about portfolios and edit them if you want. The module brings you 03 comment systems, you can choose one in Configuration section:

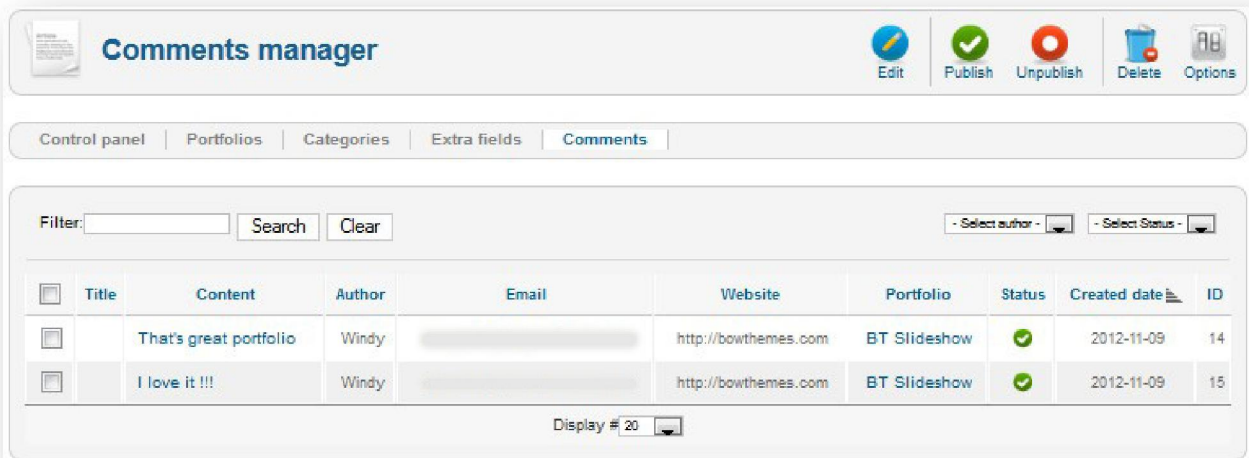

- **Built-in Comment System**

This is comment system of the component, so you can only manage comments by using it.

In front-end, comment form looks like this:

If you use default comment system of BT Portfolio, you will be able to see and edit them right in Comment section of the module.

And this is edit form of comment:

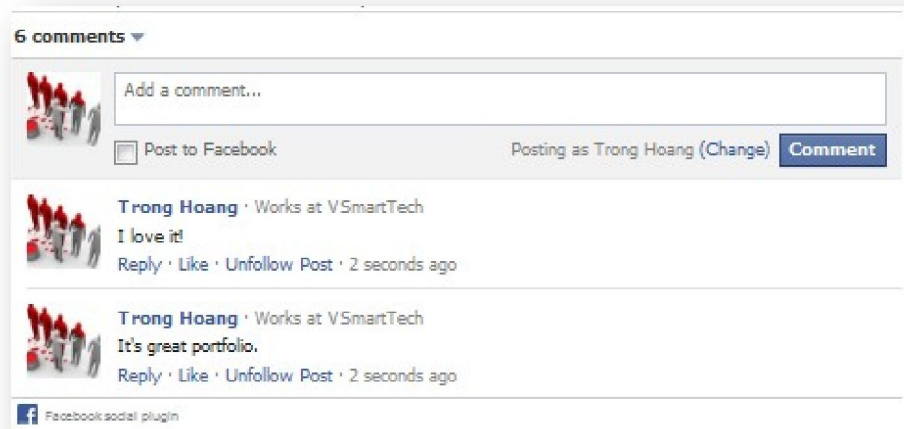

The screenshot shows a comment edit form with the following fields and content:

- Title \***: [Empty text box]
- Author \***: [Windy]
- Email \***: [Empty text box]
- Website \***: [http://bowthemes.com]
- Status**: [Published]
- Created date**: [2012-11-09 07:26:32]
- Content**: [That's great portfolio]

Below the content field, there is a path indicator: Path: p. At the bottom, there are several buttons: Article, Image, Page Break, Read More, and Toggle editor.

- **Facebook Comment**

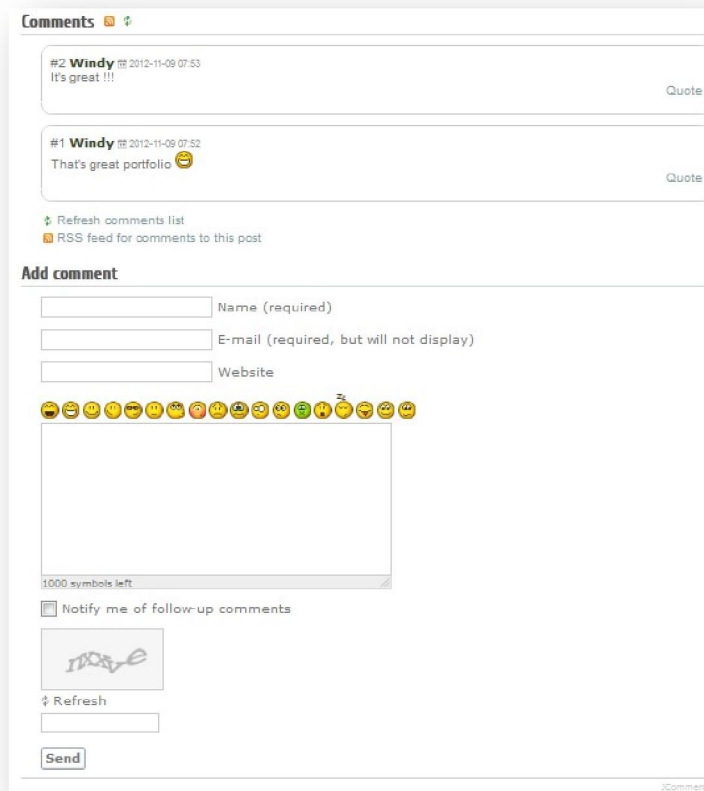

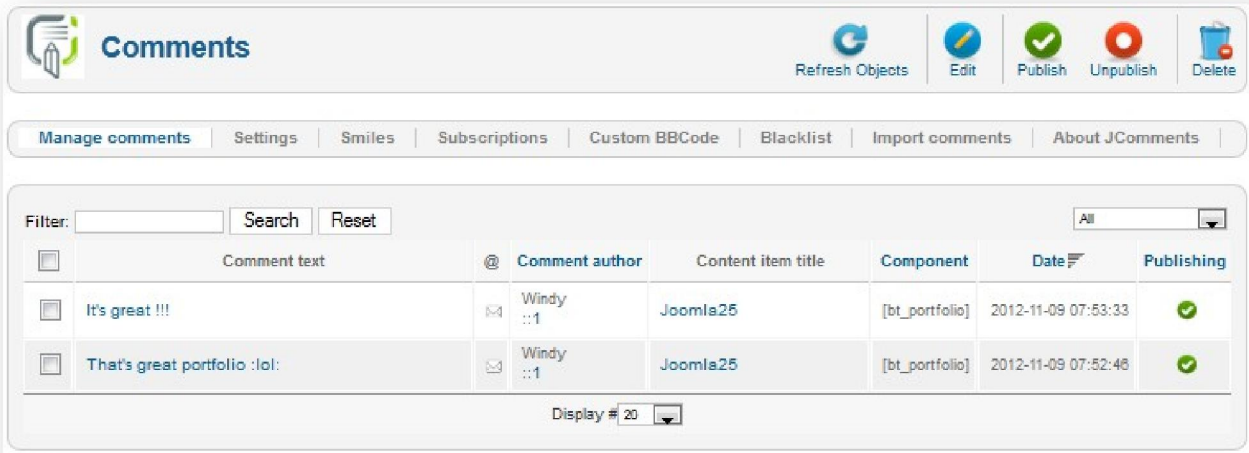

A familiar social plug-in, easy to use, easy to broadcast your portfolios to Facebook but you are not able to manage comments as Built-in comment system. So you can only view them in front-end in this form:

- **JComment**

It is free component with that you integrate comment system to your website. You can also manage comments but only in JComment back-end, not in BT Portfolio's one.

Illustrated images of JComment:

 **Edit comment**

**BT PORTFOLIO COMPONENT FOR JOOMLA 2.5**

 BT Portfolio is a Joomla component which allows you to present your favorite projects on your website. BT Portfolio, indeed, is built to help users manage the portfolio playlist with further description, photo gallery and other extra fields included.

**COMPONENTS FEATURES:**

- ✓ Multi-level management of categories.
- ✓ Ability to manage every single photo album under each portfolio and to select your featured photo for the album.
- ✓ Good management of voting and review.
- ✓ Ability to well manage the extra fields in accordance with category and portfolio items.

After clicking, a modal window is showed. It contains 05 tabs:

- ✓ **Display Options:** These are parameters relating themes, styles of portfolio list, image quality, etc...
- ✓ **Review Options:** All parameters of Comment and Voting System are gathered here.
- ✓ **Slideshow Options:** You can see here parameters relating Slideshow of portfolio's gallery.
- ✓ **Advance Options:** Watermark parameters are putted into this tab.
- ✓ **Print Options:** Customize a layout for print page and allow visitor to print your portfolios here.

Let's discover each tab to see how they work.

- Display Options

The screenshot shows a modal window titled "BT PORTFOLIO CONFIGURATION" with three buttons: "Save", "Save & Close", and "Cancel". Below the title bar are five tabs: "Display options", "Review options", "Slideshow configs", "Advanced options", and "Print options". The "Display options" tab is selected and contains the following settings:

- THEMES OPTIONS:**
- Select theme:** A dropdown menu currently set to "default".
- Show social share:** A toggle switch set to "NO".
- Social share button:** A text input field containing "Select Some Options".
- Show url:** A toggle switch set to "YES".
- Show zoom image:** A toggle switch set to "YES".
- Zoom image type:** A dropdown menu currently set to "Original image".
- Show categories menu:** A toggle switch set to "NO".

- Themes Options

<b>WM Rotate</b>	Specify watermark image overlay rotation. Unit: Degree

- **Print Options**

This feature allows visitors of your website to print out information of portfolios. You can edit print layout by changing position of {KEY\_WORK} but selecting original layout is recommended.

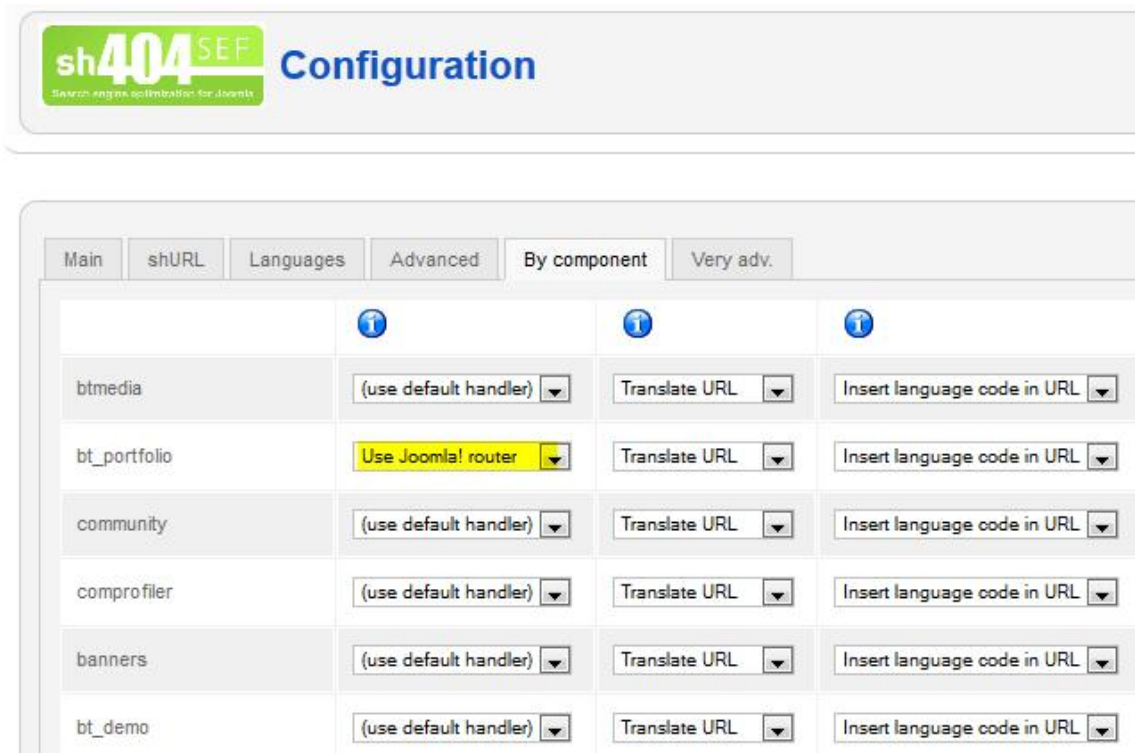

# Common Error Using Product

## Problem with Flash Uploader

At present, some web browsers don't support Flash or they're having problem with it, so you can't upload images to portfolio's gallery. Please use Simple Uploader instead, it's just original File input of HTML.

## Conflict with sh404 Component

If you are using sh404 for SEO on your site, your web.site may come across an error (Not Found 404 or Internal Server Error 500). In this case please open sh404 component, find **BT Portfolio** in **By component** tabs, then choose Use Joomla Route for the component like in the image below:

## Uninstall by limitation of file size

Installation package of this component takes 2MB, not too large, but the problem here is that some hosting services only allow customers to upload file with capacity less than 2MB. To solve it, you should contact with your hosting provider to increase upload max size.

You can see this information in Site > Site Information > PHP information tab

The screenshot shows the Joomla! System Information page, specifically the PHP Information tab. The PHP version is 5.3.8. The system information includes:

- System: Windows NT HUNGTRUONG-PC 6.1 build 7601 (Windows 7 Ultimate Edition Service Pack 1) AMD64
- Build Date: Sep 16 2011 21:25:01
- Compiler: MSVC9 (Visual C++ 2008)

The PHP configuration table is as follows:

unserialize_callback_func	no value	no value
<b>upload_max_filesize</b>	<b>2M</b>	<b>2M</b>
upload_tmp_dir	D:/wamp/tmp	D:/wamp/tmp
user_dir	no value	no value
user_ini.cache_ttl	300	300
user_ini.filename	.user.ini	.user.ini
variables_order	GPCS	GPCS

## Problem with image processing

If you use BT Portfolio in a long time, many images were created. In case that you try to change its size in control panel, that might cause the server to be overloaded because it can't process all images at the same times. Thus, after setting a new dimension of the images, please save change and click "Rebuild Image" in "Portfolios Manager" to resize images one by one.

Afterward, the web browser will direct to the page that show you progress of image processing.

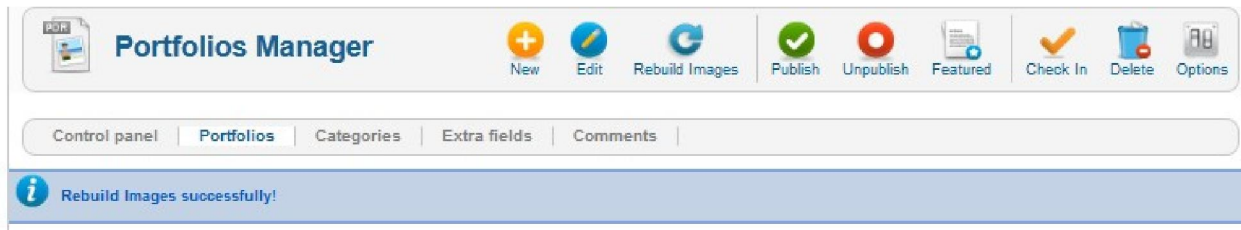

### Rebuild thumbnail & large images of portfolios:

**Total: 12 images**

---

- BT Coporate: *Jellyfish.jpg*
- BT Coporate: *Penguins.jpg*
- BT Coporate: *Hydrangeas.jpg*
- BT Coporate: *Desert.jpg*
- ...

After successful image rebuilding, browser will redirect to previous page with a notice like illustrated image:

# Contacting Bowthemes

---

All Bowthemes products include forum support, email support and ticket support. Please refer your membership package to select the compatible kind of support, as we may be able to solve the problem without delay.
